EDUCATION

Medi-Caps University

Bachelor of Technology in Computer Science - CGPA 8.3/10

Indore, M.P

Nov. 2020 – July 2024

EXPERIENCE

Frontend Developer

Vidyayatan Technologies

December 2024 – Present

On-site, Bhopal, India

- Revamped **Home Review** (Tenant Management, NZ) UI, raising tenant retention by 10% and improved the with ShadCn components.
- Engineered dashboards for inspections and tenant workflows, improving property manager response efficiency by 15%.
- Delivered cross-platform features for **Labour Link** (1000+ employees, South Africa), reducing manual attendance logging effort by 30%.
- Partnered with QA to slash post-deployment bug counts by 15% through API optimization and proactive testing.

Frontend Engineer (Part-Time)

NexusDevOps

July 2024 – Present

Remote, New Jersey, US

- Redesigned core product pages ([NexusDevOps](#)), delivering 10+ reusable UI components with React and Tailwind.
- Integrated APIs with robust testing, reducing bug reports and improving frontend-backend stability.

Technical Intern

IMPETUS

August 2023 – October 2023

Remote, India

- Developed 5+ fully responsive and user-friendly web interfaces, increasing user engagement metrics by 18%.
- Utilized Git for efficient version control, resolving merge conflicts 2x faster and enhancing team productivity.
- Built modern, dynamic UIs using React and TailwindCSS, reducing development time by 25% through utility-first CSS practices.

PROJECTS

StackMeme | *React, Appwrite (BaaS), Git*

Source Code

- Built a community-driven meme platform for developers, inspired by StackOverflow's Q/A model but tailored for humor.
- Implemented secure authentication, media uploads, and peer-review workflows using Appwrite services.

CodeCache | *React, TailwindCSS, Appwrite (BaaS), Typescript*

Source Code

- Developed a code snippet management tool with tagging, filtering, and search for efficient snippet retrieval.
- Designed public/private sharing workflows and optimized data models using Appwrite database.

Finboard | *React, Appwrite (DB, Storage, Auth), OpenAI, ShadCn, ChartJs, v0*

Source Code

- Created an AI-powered financial dashboard to track income, expenses, and spending patterns with real-time insights.
- Integrated authentication, structured data models, and analytics to provide a seamless financial tracking experience.

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, JavaScript, HTML/CSS

Frameworks: React, Next, Material-UI, SwiftUI, React Native, Streamlit, Capacitor

Developer Tools: Git, Github, AWS, VS Code, Xcode, Firebase, Postman, Cursor AI, Windsurf

Libraries: TailwindCSS, GSAP, ChartJS

Others: Figma, Webflow, Framer, Deep Learning, Supabase, Appwrite

Soft Skills: Teamwork, Adaptability, Communication, Critical Thinking
