EDUCATION

Medi-Caps University — Indore, M.P
Bachelor of Technology in Computer Science — *Nov. 2020 – July 2024*

EXPERIENCE

Frontend Developer — December 2024 – December 2025
Vidyayatan Technologies — *On-site, Bhopal, India*

- Maintained and improved a **Tenant Management** web application using **React** and **Tailwind CSS**, contributing to a 8–10% increase in tenant engagement across active users.
- Created and maintained mobile applications using **Capacitor**, supporting releases on the **App Store** and **Play Store** for 2 internal products.
- Contributed to the launch of the company's **LMS mobile application**, assisting with build, testing, and store submission across multiple release cycles.
- Improved onboarding flows and created **admin dashboards** for a **Labour Management System** used by 500+ users, reducing manual onboarding steps by 10–15%.
- Added analytics views, subscription tracking, and QR-based scanning features, and supported QA efforts to reduce recurring production issues by 10%.

Technical Intern — August 2023 – October 2023
IMPETUS — *Full-Time, Remote, India*

- Developed 5+ fully responsive and user-friendly web interfaces, increasing user engagement metrics by 18%.
- Utilized Git for efficient version control, resolving merge conflicts 2x faster and enhancing team productivity.
- Built modern, dynamic UIs using React and TailwindCSS, reducing development time by 25% through utility-first CSS practices.

PROJECTS

PathWise | *Next.js, Claude API, Supabase, tRPC, Drizzle* — Source Code

- Developed a career guidance platform built with **Next.js**, featuring a responsive, component-based UI.
- Integrated the **Claude API** to generate personalized career recommendations based on structured user inputs.
- Set up authentication and data handling using **Supabase** and **tRPC**, managing multiple data models via **Drizzle ORM**.

CodeCache | *React, Tailwind CSS, Appwrite (BaaS), TypeScript* — Source Code

- Created a responsive code snippet management web app using **React** and **Tailwind CSS**.
- Added tagging, filtering, and search functionality to manage 100+ saved snippets efficiently.
- Integrated **Appwrite** for authentication, database management, and secure public/private sharing.

PennWise | *React, Supabase, ShadCn, Chart.js* — Source Code

- Designed a personal finance tracking interface built with **React**, focusing on a clean, responsive layout.
- Visualized income and expense data using **Chart.js** across multiple monthly views.
- Integrated **Supabase** authentication and real-time data storage for secure, user-specific access.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend: React, Next.js, TailwindCSS, Capacitors
Backend & APIs: Node.js, Express.js, FastAPI
Databases & BaaS: Supabase, Appwrite, MongoDB
Libraries & Testing: Chart.js, GSAP, Jest
Tools & Platforms: Git, GitHub, VS Code, Postman, Firebase, Xcode, Vercel, AWS
AI-Assisted Tools: Cursor, Codex, v0
Design & Prototyping: Figma, Webflow, Framer
